A CAMPUS-SIZED SOLUTION

Borrow Buddy Campus

A little help, right when you need it.

A campus item borrowing system that makes sharing essentials simpler, clearer and more accountable.

CB23F35 – Low-Code Application Development using Zoho Creator

A small problem can interrupt a whole day.

A student needs a charger, calculator or lab coat — finding one shouldn't become a campus-wide search.

THE MOMENT

“I just need a calculator for this practical.”

Then come the messages, the waiting, the uncertainty: Who has one? Is it available? When should it be returned?

01

Scattered requests

Borrowing happens through informal chats or word of mouth.

02

Unclear availability

Students may not know which items are free to borrow.

03

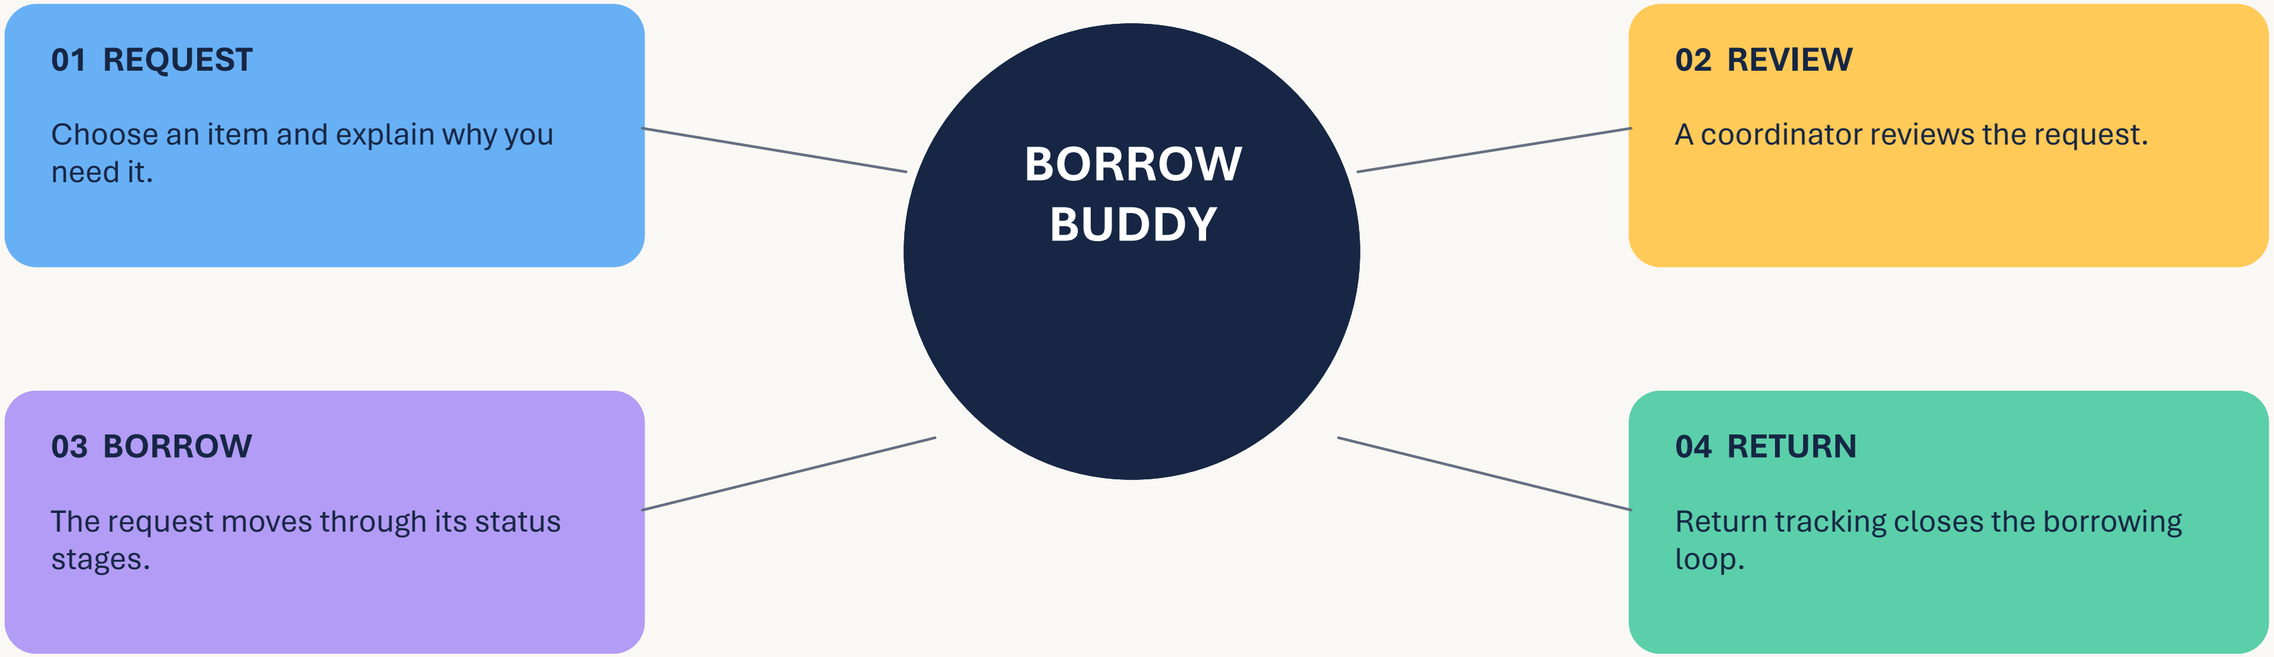

No shared tracking

Approvals, due dates and returns are harder to follow.

The goal: make borrowing feel as easy as asking a friend — with the clarity of a proper system.

One place to ask, approve, borrow and return.

Borrow Buddy Campus brings the borrowing journey into a single Zoho Creator application.

A simple journey. A clearer experience.

Designed around the people using it.

Each part has a job — from keeping item records tidy to making the next step visible.

STUDENT REGISTRATION

Keeps borrower details organised.

ITEM REGISTRATION

Tracks items and their availability.

BORROWING REQUEST

Captures item, reason, dates and urgency.

APPROVALS & BLUEPRINT

Moves requests through defined stages.

RETURN TRACKING

Updates item availability after return.

FEEDBACK & DASHBOARD

Collects feedback and shows request trends.

Built with Zoho Creator forms, reports, dashboards, Deluge functions and workflows.

Behind the scenes: less chasing, more clarity.

Low-code logic helps keep important steps connected.

WHAT'S ALREADY IN PLACE

- Return workflow tested: returned item becomes Available.
- Blueprint created for request lifecycle stages.
- Approval process configured for Student Peer Coordinator.
- Dashboard displays request, return and registration counts.

A transparent note

Email delivery, production deployment and full portal sign-in were not confirmed. The report distinguishes configured features from tested outcomes.

A better borrowing experience is built on small wins.

The value isn't just in storing records — it's in making the next step easier to see.

MORE VISIBILITY

Students can check request progress instead of repeatedly asking for updates.

BETTER ACCOUNTABILITY

Items, requests and returns have a clearer record.

ROOM TO GROW

Future upgrades can add stronger notifications, portal access and richer analytics.

“A charger, a calculator, a lab coat — small things that can make a big difference to someone's day.”
